Spring? It's Really Not So Far Away!

We've been saving this picture for some week when it's wintry weather — just so you can really appreciate the summer beauty of the Elks Memorial Park in Vulcan. In this panoramic view of the

upper part of the park, the Memorial Stone can be seen at the right and elevator row is in the far right background. The picture was taken from the adjoining Lions Memorial Swimming Pool by Jean Moyer.

Discuss Parity Prices For Agriculture

(Contributed)
What is Parity Income for Agriculture? That was the topic of discussion at Farm Forum across Canada on Monday evening, Jan. 7. It was the commencement of a four program series all to do with parity for agriculture. For the next three Mondays forums will be studying the problem that seems to concern agriculture today.

The Gaye West Forum met at the home of Frank Hubka and there were two visitors present.

The radio panel was a forerunner to the evening conversation. The word "Parity" was defined as "Equality," equality of agricultural income to that of other occupations. It does not compare very favorably and seldom has it done in past years, was the unanimous decision of those present. In 1955 agriculture's contribution to the national income was only seven percent, while at the same time 16 percent of the working force was employed in that industry.

Paratively these two percentages should have been the same. Of course these are national statistics and will vary considerably in different regions, so obviously while some will enjoy a more favorable share, others will not and are suffering even more greatly. In industry when one concern cannot make a worthwhile financial gain they immediately amalgamate with another or will soon disappear entirely. That is not the case with our farmers, a great many are only existing with a very inferior standard of living and working long after many are able to stop. Consequently it is those that the experts aim at when they say "farmers are not efficient". How can they be? It takes capital to secure efficiency but in order to do this they would have to have a loan which they cannot get because they are not efficient and haven't securities enough for backing. The farmer who doesn't need extra cash can get more than he needs, and the industrious hard-working man who has nothing to work with can't get the capital to help him out.

Opinion was mentioned at the meeting that farmers need Parity Credit as well as parity income and prices. The urban worker needs only to have a job now and can immediately take out a long term contract to buy a modern home, costing him a very small down payment followed up with

monthly installments about the same as he would ordinarily pay for rent. If he loses his job he is secure with nothing offered as security, quite different than any bank loan that a farmer may indulge in.

On Oct. 29, last, farm forums discussed "School Milk" As the records are now tabulated 91 percent of 425 farm forums believed that Canada needs a national school milk program. Various suggestions were submitted as to how this should be done with the major percentage saying that the local dairies could arrange the supply and distribution. As for financing, the majority stated that the federal and provincial governments should stand the cost.

Of course 425 forums are not many for all across Canada but by the law of averages the percentage vote would have been similar had there been even 4,250 forums.

The next meeting will be at the home of Rudy Hubka on Jan. 14.

Well Known For Nursing Work, Cora Rinehart Dies

MISS CORA RINEHART

Miss Cora Rinehart, well known Vulcan resident, passed away Dec. 23, in the Vulcan hospital, following a long illness. She was 73 years of age.

Born in Cairo, Ohio, April 24, 1883, she came to Canada to the Nanton district in 1909. Nursing in private homes was her main work until 1917, when she built a small hospital in Vulcan and operated it until December 1928, at which time her health caused her to give up nursing.

Miss Rinehart lived in Turner Valley from 1933 until January, 1949, when she returned to Vulcan to live with her sister, Mrs. Mary Boose.

Wherever she lived, Miss Rinehart was always very active in church work. Foreign mission work was always her main interest and she will be greatly missed by the Keystone Mission Class of the Vulcan Church of Christ.

Funeral services were conducted at the Vulcan Church of Christ by Mr. James Chapman and Mr. E. G. Hansell on Wednesday, Dec. 26. Interment was made in the Vulcan cemetery.

Pioneer Resident 98 This Week

Grandma Susan Steiner, who resided many years in the Loma district north of Vulcan, celebrated her ninety-eighth birthday on Wednesday, Jan. 9. During this past winter she has made her home with Mr. and Mrs. Walter Steiner in the Arrowwood district.

She was born in 1859 in the village of Leichtenwald, near Berne, Switzerland. In 1882 she and her husband Emil moved to Nevada, where they operated a horse ranch. In 1904 the family moved into the Vulcan district, where they have resided ever since.

Walter and his father made the rugged three-month trip from Nevada to Vulcan in a covered wagon, driving their stock and horses overland.

Her sons, Walter and Charlie, still farm in the district. A daughter, Helen, (Mrs. Lea McFarland) resides in Calgary. There are twelve grandchildren and twenty-six great grandchildren.

Granny Steiner is still able to read without the aid of glasses and enjoys her knitting for a pastime. We would like to extend the heartiest good wishes to her on this great birthday.

IN MEMORIAM

LOVE—In loving memory of our
father, Thomas Love, who passed
away on Jan. 12, 1946.

Another year has passed away,
but in my heart I'll always think
of you, dear Dad.

Just a token of love and
remembrance,
To Dad, who was one of the
best;

The joys that he missed on life's
path
May he find in God's garden of
rest.

—Sadly missed by his daughters.

It takes
money to make
good gasoline

Gasoline quality has risen tremendously in the past few years. Two gallons of today's gasoline do the work of three in the '20s.

Finding new techniques to make these improved gasolines, and new equipment to put these techniques to work, has cost a lot of money.

Imperial, with by far Canada's most extensive oil research facilities, has spent 20 million dollars over the past ten years on research alone.

Imperial spent 65 million in the same period directly on new equipment to improve gasoline quality.

It's costing more and more money
to make the gasolines required
by today's more powerful cars.

YOUR ALBERTA

THIS IS THE CONTINUATION OF THE "YOUR ALBERTA" SERIES STARTED LAST FALL. It is designed to keep you informed on the workings of your Government. Further information can be obtained by filling in the coupon below.

CAN YOU THINK OF ANY ONE BRANCH of a department in your government that makes sure the cleanliness of the cafe or restaurant you frequent is maintained to a definite health standard; that the garbage disposal field in your community is located properly and maintained adequately; that makes sure the proposed site of any new hospital is suitable; that inspects slaughter houses; and examines all water-works and sewage line, and disposal areas, as well as myriad other aspects of municipal health devices?

THE FACT THEY ARE SO LITTLE KNOWN and their duties receive such little publicity is a comforting assurance the branch is doing its job quietly and efficiently. You and your family are the ones who benefit.

THE DEPARTMENT OF HEALTH'S ACTIVITIES cover much ground. Today there is ready recognition of the requirements of mental health and one of the means by which this objective is being maintained is through the Guidance Clinics. One each is operated full time at Edmonton, Calgary and others part time at smaller Alberta communities.

AT THE CLINICS, a staff skilled in child guidance evaluates the emotional disturbance of youngsters who are referred to them, diagnoses their probable cause and suggests remedial action. More than 3,000 people were treated last year and the number grows each year. Those who are treated are almost always improved in their adjustment to their environment. So, they lead happier lives.

BE SEEING YOU SOON!

THE SANITARY ENGINEERING BRANCH of the Department of Health is the organization on which depends, to a tremendous degree, your health and that of your family and neighbors. The inspectors of the branch ensure your dairy delivers pure milk; their engineers save municipalities thousands of dollars and possibly scores of lives by recommending and stipulating when they instal water utilities.
